INTRODUCTION

February 28, 2019

Board of Trustees
Arkansas Teacher Retirement System
1400 West Third Street
Little Rock, AR 72201

The Arkansas Teacher Retirement System (the “System” or ATRS) is pleased to submit this Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2018. The ATRS CAFR provides comprehensive information on the retirement plan that ATRS administers. Responsibility for both the accuracy of the data and the completeness and fairness of presentation rests with the System. To the best of the System’s knowledge and belief, the enclosed data is accurate in all material respects and presents fairly the System’s financial status and changes in the financial condition.

The 2018 Financial Report is presented in five sections. Contents are summarized below (a detailed Table of Contents may be found on page 3).

Introductory Section:

This section contains the transmittal letter, the Board of Trustees, and organizational chart.

Financial Section:

This section provides the System’s financial statements, required supplementary information, and supporting schedules with additional information about the System’s expenses.

Investment Section:

This section includes the investment consultant’s report, investment policies, asset allocation, and investment results.

Actuarial Section:

This section provides the certification letter from the independent actuary, supporting schedules, and a summary of plan provisions.

Statistical Section:

This section presents schedules and tables of comparative data related to the membership, active and retired, of the System.

On March 17, 1937, ATRS was established by Act 266 of 1937. ATRS is a combination contributory/noncontributory retirement system governed by Arkansas retirement law, Chapter 24 of the Arkansas Code. ATRS is one of five state-supported retirement systems in Arkansas and provides retirement, disability, and survivor benefits to employees of Arkansas public schools and educationally related public agencies. The System has 340 participating employers.

Investments

Performance across capital markets was broadly positive during fiscal year 2018, with both non-U.S. markets and U.S. markets posting strong returns. Within the U.S., economic indicators show signs of continuing improvement. While the global outlook is still uncertain and corrections should be anticipated, markets have shown momentum and resiliency.

ATRS has structured a diversified portfolio that has allocations to equity markets, bonds, private equity, real assets, and alternative investments. Investing in multiple asset classes not only allows the System to benefit from equity advances, but also offers protection during down markets. The approach is not static and changes in accordance with the changing investment environment. For example, the target allocation to equities continues to add global diversification, and investments in alternative asset classes such as real assets continue to be added. These target allocation alignments are designed to further stabilize the portfolio and match the ATRS assets to its liabilities.

Over the long-term, ATRS’ investment approach has proved beneficial. For example, over the 1-year, 3-year, and 5-year periods ending June 30, 2018, ATRS ranked in the top 1% in the universe of large public pension funds. ATRS maintains a roster of compelling investment managers, and new opportunities that will benefit the System are being considered. ATRS still uses indexing to level out risk. A focus on long-term growth potential, coupled with asset protection and cost containment, continues to be a focus for ATRS.

Additions/Deductions to Plan Net Assets

As a retirement system matures, employer and member contributions are supplemented from investment earnings to fully fund retirement benefits and operating costs. This process is intended to leave the investment nucleus untouched to continue providing the required investment income for future generations of plan participants.

Fiscal year 2018 contributions totaled about \$563 million dollars (\$424 million employer and \$139 million member) and remained stable from previous years. As ATRS becomes a more mature system, the total active members compared to retirees will continue to move more towards a one-to-one ratio, and is now about a 1.5 to 1 ratio. This equalization trend will occur for some time as ATRS matures, as the Baby Boomer generation reaches retirement age, and as schools continue to consolidate and outsource nonteaching positions to private contractors in transportation, food service, classroom support, custodial services, and substitute teachers.

Funding Status

ATRS has recovered well since the financial crisis in 2008 and 2009. ATRS had a 11.36% market return as compared to its 7.5% assumed rate of return. To reduce the impact of wild swings in the financial markets, annual results are spread over a four-year period (four year smoothing). This means the returns above or below 7.5% will be smoothed in through fiscal year 2018. ATRS remains a stable 80% funded. Amortization required to fund the unfunded accrued actuarial liability (UAAL) decreased to 28 years.

Internal Controls

Internal controls are at the heart of safeguarding the System's assets. ATRS has an active internal audit department that is continually reviewing and updating control policies. As the System grows and technology advances, we feel it prudent to continuously monitor internal systems and policies to detect and correct potential errors before they occur and to correct any errors that are discovered as soon as possible.

Professional Services

The ATRS Board of Trustees employs firms that are proven experts to draw on their knowledge and expertise on policy and administration. ATRS' independent general investment consultant and real asset consultant is AON Hewitt Investment Consultants (formerly known as Hewitt EnnisKnupp), headquartered in Chicago, IL; the private equity consultant is Franklin Park Associates, LLC of Bala Cynwyd, PA; and the independent actuary is Gabriel Roeder Smith & Company, headquartered in Southfield, MI. The System also uses the services of local legal firms.

Acknowledgements

This report is intended to provide complete and reliable information as a foundation for management decisions, determining compliance with legal provisions, and determining conscientious administration of the System's fund. Compilation of this report symbolizes the collective efforts of the staff, under the direction of the Board of Trustees.

This report is posted on the ATRS website (artrs.gov), and hard copies are available upon request.

Respectfully submitted,

Clint Rhoden

Notes to Financial Statements

June 30, 2018

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity/History

Act 266 of 1937, as amended, established the Arkansas Teacher Retirement System (ATRS) as an office of Arkansas state government for the purpose of providing retirement benefits for employees of any school or other educational agency participating in ATRS. Act 427 of 1973, as amended, provided that the general administration of ATRS, responsibility for its proper operation, and responsibility for making effective the provisions of the Teacher Retirement law are vested in a 15-member Board of Trustees. The State Bank Commissioner, Treasurer of State, Auditor of State, and Commissioner of Education are ex-officio trustees. The remaining 11 trustees are elected and consist of seven active members of ATRS with at least five years of actual service, three retired members receiving an annuity from ATRS, and one active or retired member from a minority racial ethnic group. The seven active trustees consist of one member from each of the four congressional districts; two administrators, of which one must be a superintendent; and one member employed in a position that does not require state licensure. The trustees are elected in accordance with rules adopted by the Board. Board members serve as trustees without compensation but are reimbursed for any necessary expenses incurred to attend Board meetings or perform other duties authorized by the Board.

B. Plan Description

ATRS is a cost-sharing, multiple-employer defined benefit pension plan that covers employees of schools and education-related agencies, including Arkansas School for the Blind, Arkansas School for the Deaf, Arkansas Activities Association, State Board of Education, regional education service cooperatives, ATRS, Arkansas Educational Television Commission, area vocational-technical schools, Arkansas Rehabilitation Services, enterprises privatized by a public school district, and educational nonprofit organizations.

On June 30, 2018, the number of participating employers was as follows:

Public schools	260
State colleges and universities	40
State agencies	11
Other/privatized	29
TOTAL	340

On June 30, 2018, ATRS's membership consisted of the following:

Retirees or beneficiaries currently receiving benefits	46,824
T-DROP participants	3,696
Inactive plan members (not receiving benefits)	12,544
Active Members	
Fully vested	45,491
Non-vested	23,154
TOTAL	131,709

Members are eligible for full retirement benefits at age 60 with five or more years of actual or reciprocal service or at any age with 28 or more years of credited service. Members with 25 years of actual or reciprocal service who have not attained age 60 may receive an annuity reduced by 10/12 of 1% multiplied by the number of months by which the early retirement precedes the earlier of (1) completion of 28 years of credited service or (2) attainment of age 60. The normal retirement benefit, paid monthly, is determined based on (1) the member's final average salary (effective April 1, 1998, computed using highest three years' salary) and (2) the number of years of service.

ATRS has contributory and noncontributory plans. The contributory plan has been in effect since the beginning of ATRS. The noncontributory plan became available July 1, 1986. Acts 81 and 907 of 1999, effective July 1, 1999, require all new members under contract for 181 or more days to be contributory. Act 93 of 2007 allows any noncontributory member to make an irrevocable election to become contributory on July 1 of each fiscal year.

Notes to Financial Statements (Continued)

June 30, 2018

B. Plan Description (Continued)

Disability retirement benefits are payable to members who are vested and demonstrate total and permanent incapacity to perform the duties of their position while in active employment. The disability annuity is computed in the same manner as the age and service annuity.

Survivor benefits are payable to qualified survivors upon the death of an active, vested member. Eligible spouse survivors receive a survivor annuity that is based on the member's years of service credit prior to their death, and minor child survivors receive a percentage of the member's highest salary earned. ATRS also provides a lump sum death benefit for active and retired members with 10 years of actual service. The amount for contributory members will be up to \$10,000 and up to \$6,667 for noncontributory members. The amount will be prorated for members who have both contributory and non-contributory service; however, members with 15 or more years of contributory service will receive the full \$10,000.

A cost of living adjustment (COLA) is payable on July 1 of each year to retirees, certain survivors, and annuity beneficiaries who received monthly benefits for the previous 12 months. The COLA is calculated by multiplying 100% of the member's base retirement annuity by 3%.

Act 11096 of 1995 created a teacher deferred retirement option plan (T-DROP) for members with 30 or more years of service credits. Act 1590 of 1999 allows for participation in the T-DROP after 28 years of credited service with a reduction of at least 6% but not more than 12% for each year under 30 years. Effective September 1, 2003, Act 992 of 2003 requires employers to make contributions on behalf of all members participating in T-DROP at rates established by the Board of Trustees. Member contributions and accumulation of service credit will cease once a member enters T-DROP. During participation in T-DROP, ATRS will credit the member account with plan deposits and interest. The plan deposits are the member's normal retirement benefit reduced by 1% for each year of service. For members who entered T-DROP prior to September 1, 2003, the reduction is 1/2 of 1% (.5%) for contributory service and 3/10 of 1% (.3%) for noncontributory service for each year above 30 years of service. The T-DROP account accrues interest at a variable rate that is set annually by the ATRS Board of Trustees. T-DROP deposits into member accounts cease at the completion of 10 years of participation in the program; however, a member may continue employment and will continue to receive interest on the account balance at the 10-year plus interest rate that is also set annually by the Board of Trustees. When T-DROP participation ceases, the member may receive the T-DROP distribution as a lump-sum cash payment or an annuity or may roll it over into another tax-deferred account. A member may also elect to defer all or part of the distribution into a T-DROP cash balance account held by ATRS.

C. Basis of Presentation – Fund Accounting

The accounting system is organized and operated on a fund basis. A *fund* is defined as a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances and changes therein, which are segregated for purposes of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations. The following types of funds, if applicable to this Agency, are recognized in the accompanying financial statements.

Fiduciary Funds

Trust and Agency Funds – Trust and Agency Funds are used to report resources held by the Agency in a trustee capacity or as an agent for individuals, other governmental units, and other funds. These include Pension Trust Funds, Employee Health Trust Funds, Investment Trust Funds, Private-Purpose Trust Funds, and Agency Funds. The specific activity accounted for at this Agency includes the following:

Arkansas Teacher Retirement System Fiduciary Pension Trust Fund

D. Basis of Accounting

Basis of accounting refers to when revenues and expenditures or expenses are recognized and reported in the financial statements. The economic resources measurement focus and accrual basis of accounting are used in Fiduciary Fund financial statements. Under the accrual basis, contributions and other revenues are recognized when earned, and benefits, refunds, and other expenses are recorded when incurred.

Notes to Financial Statements (Continued)

June 30, 2018

E. Federal Income Tax Status

During the year ended June 30, 2018, ATRS was a qualified plan under 26 USC § 401(a) and was exempt from federal income taxes under 26 USC § 501(a).

F. Cash and Cash Equivalents

Cash and cash equivalents include demand accounts, imprest accounts, cash on hand, cash in State Treasury, all short-term instruments with maturities at purchase of 90 days or less, and deposits in the Short-Term Investment Fund (STIF). The STIF is created through daily sweeps of excess cash by the custodial bank into bank-sponsored commingled funds that are invested in U.S. Government and agency securities and other short-term investments.

G. Capital Assets

Capital assets purchased and in the custody of this Agency were recorded as expenditures at the time of purchase. Assets with costs exceeding \$5,000 and an estimated useful life exceeding one year are reported at historical cost, including ancillary costs (such as professional fees and costs, freight costs, preparation or setup costs, and installation costs). Gifts or contributions are generally recorded in the accounts at acquisition value at the time received. Acquisition value is the market value if the Agency would have purchased the item. Depreciation is reported based on a straight-line method, with no salvage value. Estimated useful lives generally assigned are as follows:

<u>Assets:</u>	<u>Years</u>
Equipment	5-20

Capital assets activity for the year ended June 30, 2018, were as follows:

Fiduciary activities:	Beginning Balance	Additions	Retirements	Ending Balance
Equipment	\$ 1,167,543		\$ 42,053	\$ 1,125,490
Less: Accumulated depreciation	<u>954,984</u>	<u>\$ 32,317</u>	<u>39,727</u>	<u>947,574</u>
Fiduciary activities, net	<u>\$ 212,559</u>	<u>\$ (32,317)</u>	<u>\$ 2,326</u>	<u>\$ 177,916</u>

H. Deposits and Investments

Deposits

Deposits are carried at cost and consist of cash in bank, cash in State Treasury, and Short-Term Investment Funds. At June 30, 2018, these totals were \$21,991,301, \$1,338,390, and \$295,285,994, respectively. State Treasury Management Law governs the management of funds held in the State Treasury, and the Treasurer of State is responsible for ensuring these funds are adequately insured and collateralized.

Custodial Credit Risk – Custodial credit risk for deposits is the risk that, in the event of the failure of a depository institution, the Agency will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party. The Agency has adopted the State Board of Finance Policy requiring the use of depository insurance and collateralization procedures to manage the risk that deposits may not be returned. As of June 30, 2018, \$4,896,068 of the Agency's bank balance of \$25,397,175 was exposed to custodial credit risk.

Investments

Ark. Code Ann. §§ 24-2-601 - 24-2-619 authorizes the ATRS Board of Trustees to have full power to invest and reinvest monies of ATRS and to hold, purchase, sell, assign, transfer, or dispose of any of the investments or investment proceeds in accordance with the prudent investor rule.

Notes to Financial Statements (Continued)

June 30, 2018

H. Deposits and Investments (Continued)

Investments (Continued)

Each investment manager is required to invest within the specific guidelines and parameters set by the Board of Trustees. Asset allocation guidelines have been established as follows:

Asset Allocation	Minimum	Target	Maximum
Total equity	50%	55%	60% **
Fixed income	13%	15%	17%
Alternatives	N/A*	5.0%	N/A*
Real assets***	N/A*	15.0%	N/A*
Private equity	N/A*	10.0%	N/A*
Cash equivalents	0.0%	0.0%	5.0%

*Due to the illiquid nature of alternatives, real assets, and private equity, it is not prudent to set rebalancing ranges for these asset classes.

**Additional allocations to total equity may be made beyond the maximum range to serve as a placeholder for unfunded and uncommitted alternatives, real assets, and private equity.

***Real assets include real estate, timber, agriculture, and infrastructure.

Fair Value – ATRS implemented Governmental Accounting Standards Board (GASB) Statement No. 72, *Fair Value Measurement and Application*, which will enhance comparability of financial statements among governments by requiring a consistent and more detailed definition of fair value and by providing information to financial statement users about the impact of fair value measurements on the government's financial position.

The fair value measurement of investments is categorized within the hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. In instances where inputs used to measure fair value fall into different levels, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation.

The hierarchy of inputs is defined as follows:

Level 1 – Unadjusted quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.

Level 3 – Valuations derived from valuation techniques in which significant inputs are unobservable.

For investments that do not have a readily determinable fair value and fall outside of the fair value hierarchy, the system establishes the value by utilizing the Net Asset Value (NAV) or its equivalent as a practical expedient.

The fair value measurement of plan investments and securities lending collateral as of June 30, 2018, is detailed on the following page.

H. Deposits and Investments (Continued)

Investments (Continued)

Cash equivalents invested in short-term investment funds are valued at amortized cost, which approximates fair value. The fund may issue and redeem shares at any time.

Equity investments are classified as Level 1 are exchange-traded securities whose values are based on published market prices and quotations from either national security exchanges or active markets for those securities.

Fixed income investments are classified as Level 2 and include publicly traded securities in inactive markets. Investments in this category are sourced from reputable pricing vendors using price matrix models and techniques. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices. Fair value is defined as the quoted market value on the last trading day of the period.

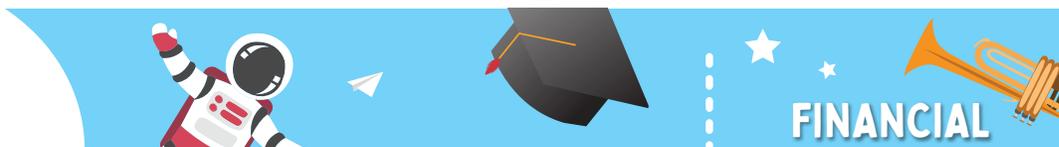

Real estate and partnerships are classified as Level 3 and are comprised mostly of owned properties leased to commercial enterprises. These investments are valued using professional property valuations or appraisals, net of debt borrowed against the related assets. Appraisals and valuations are updated every three years.

Derivative investments include forward contracts and rights, are classified as Level 2, and are valued using observable exchange, dealer, or broker market pricing.

Pooled and alternative investments generally do not have readily obtainable market values and are valued using the net asset value (NAV) per share (or its equivalent). These values are based on the capital account balance of the general partner reports at the end of each reporting period, adjusted by subsequent contributions, distributions, management fees, and changes in values of foreign currency. There are inherent uncertainties in estimating fair values for these types of investments, and it is possible that the estimates will change in the near-term or the subsequent sale of assets will be different from the reported net asset value. Generally, the investments cannot be redeemed or have certain redemption restrictions, and distributions are from the liquidation of the underlying assets. The expected holding period is dependent on the discretion of the fund manager.

The valuation for investments measured at the net asset value (NAV) per share (or its equivalent) is presented on the following pages:

Net Asset Value (NAV) Investments	Type	Strategy/Objective	NAV	Unfunded Commitments	Redemption Frequency	Redemption Notice Period

H. Deposits and Investments (Continued)

Investments (Continued)

Securities Lending Collateral - Cash collateral received from borrowers in the securities lending program are invested in a Quality D short-term investment fund that consists of a liquidating account with a liquidity pool and a duration pool. The value of this fund has been determined by the fund administrator using the NAV per share (or its equivalent).

Rate of Return - The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested. For the year ended June 30, 2018, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 11.46%.

Interest Rate Risk - Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Investments can be highly sensitive to changes in interest rates due to their terms or characteristics. The Agency has not adopted a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

The summary below indicates that 98% of the Agency's investment maturities are one year or longer.

Investment Type	Fair value	Investment Maturities (in Years)			
		Less than 1	1-5	6-10	More than 10
U.S. Government obligations	\$ 7,841,258			\$ 7,841,258	
Corporate obligations	777,231,513	\$ 42,848,086	\$ 339,220,172	287,113,155	\$ 108,050,100

Securities Lending Collateral

Quality D short-term investment pool	\$ 506,400,660	\$ 505,187,352	\$ 1,213,308
--------------------------------------	----------------	----------------	--------------

Asset-Backed Securities - As of June 30, 2018, ATRS held asset-backed securities with a fair value of \$36,981,990. These securities represent interests in various trusts consisting of pooled financial assets other than mortgage loans conveyed by the issuing parties. ATRS's ability to recover the amount of principal invested in these securities depends on the performance and quality of the trust assets. At June 30, 2018, ATRS held no asset-backed securities that were considered highly sensitive to changes in interest rates.

Mortgage-Backed Securities - As of June 30, 2018, mortgage-backed securities had a fair value of \$3,090,568. The yields and maturities of mortgage-backed securities generally depend on when the underlying mortgage loan principal and interest are repaid. Although the full amount of principal will be received if prepaid, the interest income that would have been collected during the remaining period to maturity, net of any market adjustment, is lost. At June 30, 2018, no mortgage-backed securities were considered highly sensitive to changes in interest rates.

Corporate Bonds - As of June 30, 2018, ATRS held corporate bonds with a fair value of \$250,356,509. Corporate bonds are debt instruments that are issued by private corporations. These bonds have a term maturity and can have either a fixed or variable interest rate. Variable interest rate bonds have adjustments that are made periodically and vary directly with movements in interest rates. At June 30, 2018, ATRS held no corporate obligations that were considered highly sensitive to changes in interest rates.

Notes to Financial Statements (Continued)

June 30, 2018

H. Deposits and Investments (Continued)

Investments (Continued)

Convertible Corporate Bonds – As of June 30, 2018, ATRS held convertible bonds with a fair value of \$474,242,229. Convertible bonds convey an option to the bondholder to exchange each bond for a specified number of shares of common stock of the corporation. Convertible bonds generally offer lower coupon rates and promised yields to maturity in exchange for the value of the option to trade the bond into stock. At June 30, 2018, ATRS held no convertible corporate bonds that were considered highly sensitive to changes in interest rates.

Promissory Notes – ATRS also held three promissory notes with a fair value of \$52,632,775 at June 30, 2018. Promissory notes are written promises to pay a stated sum at a specified date or on demand. Two unsecured promissory notes were issued to Big River Steel Holdings, LLC, and one secured note was issued to Highland Pellets, LLC. ATRS held no promissory notes that were considered highly sensitive to changes in interest rates at June 30, 2018.

Credit Risk – Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. This risk is measured by the credit quality of investments in debt securities as described by nationally-recognized statistical rating organizations. The Agency has not adopted a formal investment policy that limits investment in debt securities based on their statistical rating as a means of managing exposure to credit risk.

The Agency's exposure to credit risk as of June 30, 2018, is as follows:

<u>Rating</u>	<u>Fair Value</u>	<u>Rating</u>	<u>Fair Value</u>
AAA	\$ 11,728,395	Aaa	\$ 20,725,108
AA	18,581,685	Aa	14,758,363
A	59,221,558	A	37,273,091
BBB	146,137,954	Baa	104,074,212
BB	101,759,953	Ba	89,343,446
B	37,405,314	B	14,515,525
CCC or below	25,897,216	Caa or below	3,320,840
Unrated	2,648,135,399	Unrated	2,764,856,889
Total	\$ 3,048,867,474	Total	\$ 3,048,867,474
<u>Securities Lending Collateral</u>			
Unrated	\$ 506,400,660	Unrated	\$ 506,400,660

Custodial Credit Risk – Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the Agency will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Agency has not adopted a formal investment policy that requires the use of depository insurance and collateralization procedures to manage the risk that investments may not be returned for any investments other than loaned securities. At June 30, 2018, \$1,022,625 of the Agency's investments were exposed to custodial credit risk.

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of the Agency's investment in a single issuer. The Agency places no limit on the amount it may invest in any one issuer. As of June 30, 2018, none of the Agency's investments in any one issuer (other than those issued or guaranteed by the U.S. Government) represent more than 5% of total investments.

Foreign Currency Risk – Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit. The Agency has not adopted a formal investment policy that limits investment in foreign currency.

Totals	\$ 978,625,731	\$ 23,153,422	\$ 961,598,275	\$ (11,022,034)	\$ 4,896,068

For Forward Currency Contracts in the schedule above, a positive number represents the market value of contracts to purchase that currency in excess of the market value of contracts to sell that currency. A negative number, therefore, represents the market value of contracts to sell foreign currency in excess of contracts to purchase that currency.

Derivatives - Derivative instruments are financial contracts or agreements whose values depend on the values of one or more underlying assets, reference rates, and/or financial indexes. Derivative instruments include futures contracts, forward contracts, swap contracts, options contracts, forward foreign currency exchange, and rights. ATRS investment guidelines state that derivatives may be used to reduce the risk in a portfolio but should not be used to create a position of leverage or substantially increase the risk of the overall portfolio. Futures and options should be matched by cash or cash equivalent securities, and all short futures positions should be matched by equivalent long security positions. Each investment manager's derivative usage is specified in the investment management agreement or specific guidelines.

Notes to Financial Statements (Continued)

June 30, 2018

H. Deposits and Investments (Continued)

Investments (Continued)

Forward Currency Contracts - ATRS enters into various currency contracts to manage exposure of foreign portfolio holdings to changes in foreign currency exchange rates. A forward exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. The contracts are valued at forward exchange rates, and the changes in value of open contracts are recognized as unrealized appreciation/depreciation in the statement of changes in plan net position. The realized gain or loss on closed forward currency contracts represents the difference between the value of the original contracts and the closing value of such contracts and is included in net appreciation (depreciation) in fair value of investments in the statement of changes in plan net position. At June 30, 2018, ATRS had outstanding forward exchange currency contracts to purchase foreign currencies with contract amounts of \$8,798,622 and market values of \$8,753,617, resulting in a net loss of \$45,005. Outstanding forward exchange currency contracts to sell foreign currencies with contract amounts of \$20,794,744 had market values of \$19,775,650, resulting in a net gain of \$1,019,094.

The fair value balances and notional amounts of derivative instruments outstanding at June 30, 2018, classified by type, and the changes in fair value of such derivative instruments for the year then ended, as reported in the 2018 financial statements, are as follows:

	Changes in Fair Value		Fair Value at June 30, 2018		Notional
	Classification	Amount	Classification	Amount	
Fiduciary funds					
Derivative investments:					
Foreign currency forwards	Investment revenue	\$ (289)			CAD
	Investment revenue	950,062	Investments	\$ 656,525	CHF \$ 12,948,000
	Investment revenue	(2,502)			EUR

	Investment revenue	366,101	Investments	366,101	ZAR 54,385,000
		\$ 1,273,533		\$ 974,088	
Rights	Investment revenue	\$ 7,488	Investments	\$ 7,488	\$ 299,500

Securities Lending Transactions - Arkansas Code Annotated and Board policy permit ATRS to participate in a securities lending program administrated by State Street Bank (the "Custodian"). The Custodian enters into agreements with broker-dealers or other entities to loan securities for collateral and have the same securities redelivered in the future. There were no restrictions on the dollar amount of securities loaned by ATRS. Securities on loan to participating brokers at year-end include U.S. Government securities, corporate securities, and international securities. Brokers who borrow the securities provide cash or other collateral, including securities issued or guaranteed by the U.S. Government. Collateral must be provided in the amount of at least 100% of the market value of the loaned securities. ATRS cannot pledge or sell collateral securities received unless the borrower defaults. The cash collateral received on each loan is invested in a collective investment fund comprised of a liquidity pool and a duration pool. As of June 30, 2018, the liquidity pool had an average duration of 27.21 days and an average weighted final maturity of 113.66 days for USD collateral. The duration pool had an average duration of 19.63 days and an average weighted final maturity of 1,999.35 days for USD collateral. Because the loans were terminable at will, their duration did not generally match the duration of the investments made with cash collateral.

Notes to Financial Statements (Continued)

June 30, 2018

H. Deposits and Investments (Continued)

Investments (Continued)

At year-end, ATRS had no credit risk exposure to borrowers due to the custodian's indemnification. The custodian indemnified ATRS by agreeing to purchase replacement securities or return cash collateral in the event a borrower failed to return a loaned security or failed to pay the trust funds for income of the securities while on loan. No borrowers failed to return loaned securities or pay distributions during the year. Investments made with cash collateral appear as an asset on the Statement of Plan Net Position. Corresponding liabilities are recorded, as ATRS must return the cash collateral to the borrower upon expiration of the loan. ATRS is exposed to investment risk, including the possible loss of principal value in the cash collateral pool, due to fluctuation in the market value of the assets held by the cash collateral pool. As of June 30, 2018, the fair value of the securities lending assets exceeded the securities lending liabilities by \$91,955.

I. Contributions

The Agency's funding policy provides for periodic employer contributions at statutorily-established rates based on annual actuarial valuations. The employer contribution rate was 14% for the fiscal year ending June 30, 2018. Contributory members are required to contribute 6% of gross wages to ATRS. Employee contributions are refundable if ATRS-covered employment terminates before a monthly benefit is payable. Employee contributions remaining on deposit with ATRS for a period of one or more years earn interest credits, which are included in the refund.

J. Reserves

In accordance with the provisions of Ark. Code Ann. § 24-7-405, ATRS must maintain reserve accounts showing net assets available for benefits. At June 30, 2018, the reserve accounts were funded at a level that complied with the code provisions.

The reserve balances at June 30, 2018, were as follows:

	<u>Total</u>
Members' deposit account reserve	\$ 11,042,863,095
Employers' accumulation account reserve	(5,509,752,789)
Retirement reserve	11,378,864,909
Teacher deferred retirement option plan account reserve	468,456,672
Survivor benefit account reserve	102,835,207
Income - expense account reserve	9,360,646
Total	<u>\$ 17,492,627,740</u>

The Code provisions define each of the reserve accounts as follows:

Members' Deposit Account Reserve - The account in which members' contributions shall be accumulated with regular interest and from which shall be made transfers and refunds of contributions.

Employers' Accumulation Account Reserve - The account in which shall be accumulated the employer's contributions to ATRS and from which shall be made transfers as provided in the code.

Retirement Reserve - The account from which shall be paid all annuities and benefits in lieu of annuities payable as provided in this act to retirants who retired on account of superannuation or disability and to beneficiaries of such retirants.

Teacher Deferred Retirement Option Plan Account Reserve - The account in which shall be accumulated plan deposits made on behalf of the member with plan interest.

Survivor Benefit Account Reserve - The account from which shall be paid survivor benefits payable as provided in this act.

Income - Expense Account Reserve - The account to which shall be credited all investment income from invested assets of ATRS. It shall also be the account in which shall be accumulated the contributions made by employers for the administrative expenses of ATRS, from which shall be made annual transfers of interest credits and excess amounts to the other accounts of ATRS, and from which shall be paid all the expenses of the Board necessary for the administration and operation of ATRS.

Notes to Financial Statements (Continued)

June 30, 2018

K. Net Pension Liability

The components of the net pension liability of the participating employers at June 30, 2018, were as follows:

Total pension liability	\$ 21,131,589,859
Plan net position	(17,492,627,740)
Net pension liability	\$ 3,638,962,119
Plan net position as a percentage of the total pension liability	82.78%

Actuarial Assumptions - The total liability was determined by an actuarial valuation as of June 30, 2018, using the following actuarial assumptions, applied to all prior periods included in the measurement:

Wage inflation rate	2.75%
Salary increases	2.75-7.75%
Investment rate of return	7.50%

Mortality rates were based on the RP-2014 Mortality Tables for Males and Females adjusted using projection scale MP-2017 Table from 2006.

The actuarial assumptions used in the June 30, 2018, valuation were based on the results of an actuarial experience study for the period July 1, 2010 through June 30, 2015.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of geometric real rates of return were adopted by the plan's trustees after considering input from the plan's investment consultant and actuary.

For each major asset class that is included in the pension plan's target asset allocation as of June 30, 2018, these best estimates are summarized in the following table:

Asset Allocation	Target	Long-Term Expected Real Rate of Return
Total Equity	55.0%	4.9%
Fixed income	15.0%	1.2%
Alternatives	5.0%	4.3%
Real assets	15.0%	4.2%
Private equity	10.0%	6.0%
Cash equivalents	0.0%	0.3%
	100.0%	

Single Discount Rate - A single discount rate of 7.50% was used to measure the total pension liability. This single discount rate was based on the expected rate of return on pension plan investments of 7.50%. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be 14% of payroll. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Notes to Financial Statements (Continued)

June 30, 2018

K. Net Pension Liability (Continued)

Regarding the sensitivity of the net pension liability to changes in the single discount rate, the following presents the plan's net pension liability, calculated using a single discount rate of 7.50%, as well as what the plan's net pension liability would be if it were calculated using a single discount rate that is 1% lower or 1% higher:

	Sensitivity of the Net Pension Liability to the Single Discount		
	1% Decrease	Current Rate	1% Increase
	6.50%	7.50%	8.50%
Net pension liability	\$6,241,311,395	\$3,638,962,119	\$1,480,855,759

L. Compensated Absences - Employee Leave

Annual leave is earned by all full-time employees. Upon termination, employees are entitled to receive compensation for their unused accrued annual leave up to 30 days. Liabilities for compensated absences are determined at the end of the year based on current salary rates.

Sick leave is earned by all full-time employees and may be accrued up to 120 days. Compensation up to a maximum of \$7,500 for unused sick leave is payable to employees upon retirement.

Compensated absences are reported in the State's "Government-Wide" financial statements but are not reported as liabilities or expenditures in the governmental funds. However, the compensated absences payable attributable to this Agency's employee annual and sick leave as of June 30, 2018 and 2017, amounted to \$533,706 and \$547,824, respectively. The net changes to compensated absences payable during the year ended June 30, 2018, amounted to \$14,118.

NOTE 2: Other Post-Employment Benefits (OPEB)

Arkansas State Employee Health Insurance Plan (Plan)

Plan Description - The Department of Finance and Administration - Employee Benefits Division (DFA-EBD) provides medical and prescription drug benefits for eligible state employees and retirees. Policies for DFA-EBD related to medical and prescription drug plans are established by State and Public School Life and Health Insurance Board (Board) and may include ad hoc benefit changes or annual cost redeterminations. For the current year, no ad hoc or cost redetermination changes occurred. The Constitution of Arkansas, Article 5, vests the General Assembly with legislative power to enact and amend duties of and benefit provisions of the board and DFA-EBD, respectively, as published in Subchapter 4, Chapter 5 of Title 21 of the Arkansas Code Annotated. DFA-EBD is included in the State of Arkansas's Comprehensive Annual Financial Report that includes all applicable financial information, notes, and required supplementary information. That report may be obtained by writing to Department of Finance and Administration, 1509 West Seventh Street, Suite 403, Little Rock, Arkansas 72201 or by calling 1-501-682-1675.

The Agency contributes to the Plan, a single employer defined benefit OPEB plan administered by the DFA-EBD, on a monthly basis. The Board establishes medical and prescription drug benefits for three classes of individuals covered as follows: active employees, terminated employees with accumulated benefits, and retirees and beneficiaries. The Plan is established on the basis of a pay-as-you-go financing requirement, and no assets are accumulated in a trust as defined by GASB Statement No. 75. The State's annual OPEB cost for the Plan is based on an actuarially-determined, calculated amount made in accordance with GASB Statement No. 75.

Notes to Financial Statements (Continued)

June 30, 2018

Arkansas State Employee Health Insurance Plan (Plan) (Continued)

Funding Policy - Employer contribution for the Plan are established by Ark. Code Ann. § 21-5-414 not to exceed \$450 per budgeted position. Employees, retirees, and beneficiaries contribute varying amounts based on the type of coverage and inclusion of family members. Retirees that are Medicare eligible will have their benefits coordinated with Medicare Part A and B with the Plan being the secondary payer. The portion of the State's annual OPEB liability attributable to ATRS as of June 30, 2018, is \$5,387,621.

NOTE 3: Required Supplementary Schedules

Detailed historical information about the pension liabilities for which the pension plan's assets are being held and managed and the significant assumptions used to measure these liabilities are required supplementary information. This required supplementary information, prepared in accordance with the parameters of GASB Statement No. 67, is included immediately following the notes to the financial statements.

Schedule of Changes in Net Pension Liability and Related Ratios

For the ten-year period ended June 30, 2018

2013*2012*2011*2010*2009*2008*

Notes to Required Supplementary Information

For the five-year period ended June 30, 2018

Note 1: Summary of significant information related to required supplementary schedules

A. Changes in benefit terms

There were no significant changes in benefit terms for the year ended June 30, 2018.

B. Changes in assumptions

There were no significant changes in assumptions for the year ended June 30, 2018.

C. Method and assumptions used in calculations of actuarially-determined contributions

Valuation date: June 30, 2018

The actuarially-determined contribution rates are calculated as of June 30 of every year, which is one year prior to the beginning of the fiscal year in which contributions are reported.

The following actuarial methods and assumptions were used to determine contribution rates reported in the schedule of contributions:

Actuarial cost method	Entry age normal
Amortization method	Level percentage of payroll, closed
Remaining amortization period	28 years
Asset valuation method	4-year closed period; 20% corridor
Wage inflation	2.75%
Projected salary increases	2.75% - 7.75%
Investment rate of return	7.50% compounded annually
Mortality table	RP-2014 Healthy Annuitant, Disabled Annuitant, and Employee Mortality Tables were used for males and females. Mortality rates were adjusted using projection scale MP-2017 from 2006.

Table	Scaling Factor	
	Males	Females
Healthy Annuitant	101%	91%
Disabled Annuitant	99%	107%
Employee Mortality	94%	84%

Schedule of Selected Information

For the five-year period ended June 30, 2018

Market Overview

The 2018 fiscal year generated another period of solid capital market returns, as optimism regarding the global economy helped investors overcome ongoing geopolitical tensions throughout the year. Global equity markets generated positive returns and U.S. yields climbed higher as the U.S. Federal Reserve (Fed) continued pace with gradually raising interest rates. That said, long stagnant volatility re-emerged during the back half of the year, igniting some caution for a period of time. Yet, in general, markets remained resilient and continued to extend the second longest bull market in modern history.

The year began on a strong note, as risky assets continued their climb supported by a healthy global economy, the approval of the most sweeping overhaul of the U.S. tax system in over three decades, and modest, yet still supportive, policy changes from global central banks. Bond yields moved gradually higher and oil prices rallied to a two-year high. Emerging market equities were the greatest beneficiaries during the first half of the year, benefitting from strong global growth, rising oil prices, and supportive central bank policies. Gains weren't without headwinds, however. Ongoing tensions between the U.S. and North Korea, concerns over the potential economic impact of two major hurricanes hitting the U.S., pending roll back of central bank easing measures, and ongoing political uncertainty, particularly across the U.S., Germany, and Italy, all tempered returns.

The second half of the year began strong through January, but equity markets quickly came under pressure once in February and then again in March. Positive economic momentum and rising inflationary pressure ignited fears of a more hawkish Fed, causing U.S. bond yields to spike to a four-year high and equity markets to sell-off sharply in February. Though stocks recovered some losses, markets experienced another correction in March due to fears of a global trade-war ignited by the Trump administration's decision to impose tariffs on various imports. The re-emergence of volatility across capital markets triggered a more cautious sentiment and less risky assets fared better for a period. Though ongoing geopolitical tensions and escalating fears of a global trade war continued to distract investors, markets ended the year on a positive note, as U.S. earnings continued to be encouraging and commodity prices continued to rise.

Throughout the year, central banks performed a balancing act of continuing to provide supportive measures while beginning the rollback of many easing policies. The U.S. Fed raised rates three times, ending the year with a range of 1.75% to 2.00%. New Chairman, Jay Powell, was welcomed by the Fed in February, and while forecasts of further rate rises increased pace due to the strengthening U.S. economy and increasing inflation, Mr. Powell stressed that rate rises would continue to be gradual. Elsewhere, the European Central Bank began scaling back its asset-purchase program and announced plans to fully end the program by the end of 2018; however, President Mario Draghi stressed that interest rates would remain on hold until at least mid-2019. The Bank of England ended up raising interest rates by 25 basis points over the year, backing away from a second hike due to slowing economic growth and falling inflation during the second half of the year. Lastly, the Bank of Japan maintained its policy measures throughout the year.

With the backdrop of positive corporate earnings and generally strong global economic growth, global equity markets generated solid returns over the one-year period ending June 30, 2018. U.S. equities led markets, supported by continued strong company earnings, renewed merger and acquisition activity and the approved U.S. tax reform in the beginning of the year. The broad U.S. equity market, as represented by the Dow Jones U.S. Total Stock Market Index, returned 14.8%. Developed international markets lagged the U.S., as political uncertainty across several countries and trade tensions with the U.S. negatively impacted economic data and equity market returns. The MSCI EAFE Index returned 6.8% in USD terms and 6.1% in local currency terms. Emerging markets started the year off strong due to optimism over the health of the global economy. However, fears of a global trade war, rising U.S. interest rates, and a strengthening USD triggered significant outflows toward the end of the year. Still outpacing international developed markets, the MSCI Emerging Markets Equity Index posted an 8.2% return in USD terms and 10.5% in local currency terms. As U.S. yields rose throughout the year, the U.S. bond market, as represented by the Bloomberg Barclays Aggregate Bond Index, declined 0.4%.

The mostly risk-on mentality drove spread sectors of the bond market to outpace safe haven treasuries, with the Bloomberg Barclays High Yield Index returning 2.6%. Overall, despite the re-emergence of volatility during the back half of the year, and seemingly relentless political drama, capital markets continued to prove resilient and most risk assets continued their climb higher.

Overview of ATRS Fund Structure

The ATRS portfolio is well-diversified across several asset classes, including global public equities, fixed income, alternative investments, real assets, and private equity. The asset allocation is a long-term Policy determined through periodic asset-liability studies and assessments of risk and liquidity needs. Within these asset classes, the investments are diversified across investment types, styles, regions and vintage years. A variety of investment firms are employed within each category to minimize manager- and firm-specific risks. We continue to believe the diversification and overall risk level of the portfolio is appropriate given the goals and objectives of the ATRS.

During the 2018 fiscal year, there was a modest shift of five percentage points in the long-term asset allocation from fixed income to global equity. This shift supports the long-term investment objectives of ATRS, better reflects how the portfolio has actually been invested, and was recently supported by the 2018 Asset-Liability Study conducted by Aon. The table below highlights the previous and new long-term asset allocation.

	Previous Long-Term Target	Current Long-Term Target
Total Equity	50%	55%
Fixed Income	20%	15%
Opportunistic/Alternatives	5%	5%
Real Assets	15%	15%
Private Equity	10%	10%
Total Fund	100%	100%

During the year, the portfolio continued to progress towards its long-term policy targets shown above. The real assets portfolio ended the year at 11.9% of Total Fund assets, still slightly shy of its long-term target of 15.0%. The opportunistic/alternatives portfolio grew to its long-term target during the year, as two new strategies were added to the portfolio, bringing the allocation to its long-term target of 5.0%.

ATRS's underlying investment manager structure remained mostly unchanged throughout the year. As mentioned above, the Board approved an allocation to alternative risk premia strategies to be housed in the opportunistic/alternatives portfolio. These investments are intended to provide diversification and added return potential, with the benefit of favorable fee and liquidity terms.

AHIC and the ATRS Investment Team continue to regularly review the portfolio allocation, structure and manager line-up, and evaluate additional types of strategies in order to best position the fund to achieve its investment objectives.

ATRS Performance Overview (annualized returns)

Periods ending 6/30/2018	1 Year		3 Years		5 Years	
	Return	Rank	Return	Rank	Return	Rank
Total Fund	11.6%	1	8.8%	1	10.1%	1
Performance Benchmark	9.2	23	7.9	8	9.4	2
Total Equity	13.4	29	9.6	28	11.5	23
Performance Benchmark	12.2	34	9.5	29	11.0	28
Total Fixed Income	1.3	19	3.3	18	3.4	30
Performance Benchmark	-0.3	84	2.1	57	2.6	57
Total Opportunistic/Alternatives	0.7	--	1.9	--	4.3	--
Custom Alternatives Benchmark	3.6	--	0.8	--	2.1	--
Total Real Assets	9.2	--	8.7	--	9.4	--
Total Real Assets Benchmark	5.8	--	7.5	--	9.0	--
Total Private Equity	22.3	--	15.4	--	15.7	--
Private Equity Policy	16.1	--	12.4	--	15.2	--

The System ended the fiscal year with approximately \$17.3 billion representing growth of approximately \$1.2 billion over the year. Strong investment earnings of \$1.9 billion drove the asset growth, which is net of withdrawals of approximately \$645 million. The investment gains equate to a 11.6% net-of-fee total return. The strong absolute returns were driven by both the global equity asset class which produced a positive 13.4% return over the year, and the private equity asset class which returned 22.3% over the year. On a relative basis, the Total Fund outperformed its Performance Benchmark by 2.4 percentage points. Relative to a peer group of U.S. Public Pension Plans with assets over \$1 billion, the Plan ended the year at the top of the group, ranking in the 1st percentile. Longer-term performance remains very strong, as the Total Fund returned an annualized 8.8% over the three-year period, 10.1% over the five-year period, and 7.6% over the ten-year period and outperformed its Performance Benchmark over each trailing time period. Further, the Total Fund also ranked in the top percentile of its peer group over both the three- and five-year time periods and in the second percentile over the ten-year period.

During the year, the total equity asset class returned 13.4%, outperforming its benchmark return of 12.2%. The value-add was decently spread across the active managers. The greatest contribution to value-add came from global equity manager, T. Rowe Price, with a return of 21.3% and outperformance of 10.6 percentage points. Longer-term performance is also positive, as the Total Equity portfolio has outperformed its Performance Benchmark over the trailing 3-, 5-, and 10-year periods.

Fixed income market returns were modestly negative during the fiscal year due to low, yet rising interest rates. However, the ATRS fixed income portfolio generated a positive return of 1.3%, adding 1.6 percentage points of value over the Performance Benchmark. Absolute return managers, Putnam and Wellington, generated impressive results of 4.1% and 5.1%, respectively, benefited from exposure to certain spread sectors and little interest rate exposure. The ATRS fixed income portfolio returns for the trailing 3-, 5- and 10-year periods exceeded those of the benchmark by meaningful margins.

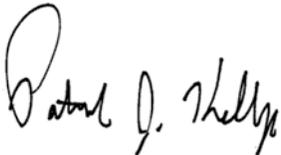

The fiscal year return of the opportunistic/alternatives portfolio generated a return of 0.7% and fell short of its Custom Alternatives Benchmark return of 3.6%. The main driver of the underperformance came from the insurance-related investments which have been negatively impacted by an active catastrophic 2017 year. Offsetting some of the relative underperformance were the hedge fund managers which each outperformed their respective benchmarks. In particular, the York credit-oriented strategy returned 12.2% and outperformed its benchmark return of 3.8%. Late in the fiscal year, ATRS equally funded two alternative risk premia strategies, Man Group and Capital Fund Management (CFM), with a total of \$200 million. These strategies are designed to provide the Total Fund with diversification and attractive risk-adjusted returns at favorable fee and liquidity terms.

The real assets category, which includes real estate, timber, agriculture and infrastructure, returned 9.2% during the fiscal year, driven by strong performance from the real estate portfolio. The real estate portfolio returned 10.8% and meaningfully outperformed its benchmark return of 7.1% while the Timber and Agriculture returns were more modest over the year. The infrastructure portfolio is still relatively immature, but achieved a double-digit since-inception (2014) internal rate of return.

The ATRS private equity portfolio returned 22.3% on a time-weighted return basis during the fiscal year benefitting the Total Fund's absolute return. The private equity portfolio also exceeded its long-term objective of adding 2 percentage points above publicly traded equities during both the fiscal year period, as well as over the trailing 3- and 5-year periods and since inception (4/1997).

We are pleased to report on the great success of the ATRS portfolio and feel it is well positioned going-forward to achieve its long-term goals.

Sincerely,

Patrick J. Kelly, CFA, CAIA
Partner

Katie Comstock
Senior Consultant

STATEMENT OF INVESTMENT POLICY

This Investment Policy has been prepared within the context of applicable Arkansas laws and is intended to allow for sufficient flexibility in the investment process to capture opportunities, yet ensure that both prudence and care are maintained in the execution of the investment program. While safety of principal is given primary consideration, the Arkansas Teacher Retirement System Board of Trustees, hereinafter “Board” may take appropriate levels of risk to earn higher levels of investment return.

The Board has arrived at this policy through careful study of the rates of return and risks associated with various investment strategies in relation to the current and projected liabilities of the Arkansas Teacher Retirement System, hereinafter, “the System”. This policy has been chosen as the most appropriate for achieving the financial objectives of the System. The policy will be reviewed periodically as circumstances dictate.

The Board has adopted a long-term investment horizon so that the chances and duration of investment losses are carefully weighed against the long-term potential for appreciation of assets. The assets of the System will be invested in a manner that provides the safeguards and diversity to which a prudent investor would adhere. All transactions undertaken on behalf of the System will be in the sole interest of the members of the System.

To achieve the overall investment goal of the System, one or more investment consultants may be retained by the Board as investment advisors. The scope of duties, together with the terms and conditions of engagement, of any investment consultant will be set forth in a contract approved by the Board. Throughout this document, investment advisors are referred to as investment consultants.

The System shall manage those assets not specifically allocated to investment managers. No investment shall be made without an investment consultant’s recommendation.

Standard of Care

The standard of care for the Board and Executive Director of the assets of the System is: when investing and reinvesting trust assets and in acquiring, retaining, managing and disposing of investments of the trust assets, there shall be exercised the reasonable care, skill, and caution that a prudent investor would use after considering the purposes, terms, distribution requirements, and other circumstances of the trust. Investment and management decisions respecting individual assets shall be evaluated not in isolation but in the context of the trust portfolio as a whole and as a part of an overall investment strategy having risk and return objectives reasonably suited to the trust. The investments of the trust shall be diversified unless the Board reasonably determines that, because of special circumstances, the purposes of the trust are better served without diversifying. The trust assets shall be invested and managed solely in the interest of the members and benefit recipients of the trust. The trust assets shall be invested in a manner to only incur costs that are appropriate and reasonable in relation to the assets and purposes of the investment. Compliance with the standard of care is determined in light of facts and circumstances at the time of action, not in hindsight.

Investment and management functions may be delegated to an investment agent that a prudent trustee of comparable skills could properly delegate under the circumstances. When making such delegation, the Board shall establish the scope and terms of the delegation, consistent with the purposes and terms of the trust, and shall monitor the investment agent performance and compliance with the terms of the delegation. In performing a delegated function, an investment agent owes a duty to the System and the trust to exercise reasonable care to comply with the terms of the delegation. In addition, the Executive Director may delegate certain duties to the System’s investment staff without relieving the Executive Director from the ultimate responsibility.

Each party serving in a fiduciary capacity for the trust shall apply the standard of care set forth herein.

Investment Policies and Procedures (Continued)

Asset Allocation

The Board is responsible for the prudent investment of funds and to maintain a proper allocation of the System’s investment assets. The Board, in conjunction with its investment consultants, shall set and adjust the System’s asset allocation ranges as necessary to provide an optimal allocation to obtain its target returns. The general investment consultant shall notify the Executive Director and the Board when an asset liability modeling study should be undertaken. It shall be the goal of the System to maintain the following asset allocation targets and ranges:

Asset Category	Minimum*	Target	Maximum*
Total Equity	50.0	55.0	60.0**
Fixed Income	13.0	15.0	17.0
Opportunistic/Alternatives	N/A	5.0	N/A
Real Assets***	N/A	15.0	N/A
Private Equity	N/A	10.0	N/A
Cash Equivalents	0.0	0.0	5.0

*Due to the illiquid nature of opportunistic/alternatives, real assets, and private equity, it is not prudent to set rebalancing ranges for these asset classes.

**Additional allocations to total equity may be made beyond the maximum range to serve as a placeholder for unfunded and uncommitted opportunistic/alternatives, real assets, and private equity.

***Real assets includes real estate, timber, agriculture, and infrastructure.

Rebalancing

The asset allocation ranges established by the Board represent the Board’s judgment of a portfolio mix that provides the greatest risk/return value. Allowing the portfolio to exceed the Board limits strays from the financial discipline, which the Board believes will - over time - provide the appropriate risk-adjusted return to the System.

The Executive Director is responsible for rebalancing the allowable asset classes and the individual portfolios if any of the asset classes falls outside of the designated range. The general investment consultant shall provide guidance and advice to the Executive Director to best achieve the rebalancing. Rebalancing among individual investment manager portfolios within asset classes may also be necessary to ensure the appropriate level of diversification is achieved by investment style, market capitalization or risk levels (see total asset class guidelines) and/or to take advantage of market conditions, fund manager expertise, opportunities, or other circumstances that could be beneficial to ATRS.

The Executive Director may rebalance across all equity managers, all equity holdings, all fixed income managers, and all fixed income holdings. A Board approved transition manager may be used for rebalancing. Rebalancing including the use of a Board approved transition manager, as needed, may be initiated by the Executive Director after recommendation from the appropriate investment consultant and positive notice to the Board Chair. The Executive Director and general investment consultant will monitor the asset values by classification for each asset manager on a monthly basis, based on month-end data provided by the custodial bank. The Executive Director and general investment consultant shall regularly inform the Board on the rebalancing pacing and strategy.

Whenever the minimum or maximum range of total equity or fixed income has been exceeded, a transfer of funds or other appropriate action will occur to bring the actual allocation within the prescribed range within a time frame determined to be prudent by the Executive Director in consultation with the general investment consultant.

Normal plan cash flows should be used to the extent possible to rebalance. Interest, dividends, and plan contributions should be used to the extent possible to fund asset classes that are below their target. Withdrawals should be made from asset classes that are above their target.

Investment Manager Selection

In order to implement its investment strategy, the System will use individual investment managers. Arkansas Code § 24-3-401 et seq. requires ATRS to always operate under the prudent investor rule. The prudent investor rule requires all investment decisions to be made based on the experience of management, rates of return, appropriate risk, reasonable cost, and all other relevant factors that

Investment Policies and Procedures (Continued)

should be used by prudent investors.

It is the policy of the Board to include, whenever appropriate, qualified minority-owned and women-owned business enterprises in the System's investment manager selection process and to objectively evaluate all qualified investment manager candidates regardless of race, gender or disability.

The Board will evaluate all qualified investment manager candidates with emphasis on demonstrated professional performance, organizational depth, institutional investment management capability, and reasonableness of fee structure regardless of the amount of investment assets under management or the age of the investment management firm.

The Board will use professional consultants that do not use discriminatory practices in the creation and maintenance of their investment manager databases and will require the investment consultants to affirm their use of non-discriminatory practices when recommending investment manager candidates to the Board.

Goals

Recognizing the purpose of the System is to remain actuarially sound and pay member benefits, the overall investment goal is to achieve, over a period of years, the greatest rate of return for the System with due consideration given to preserving capital and its purchasing power, and to maintain an appropriate level of risk consistent with the obligations of a prudent investor. The return of the System should exceed, net of fees, a policy benchmark comprised of the respective asset class benchmarks weighted by the asset class policy targets over a full market cycle (approximately five years). During periods of transition to and from non-marketable and illiquid asset classes such as private equity and real assets, actual allocations may be used over extended periods to reflect these changes in the policy targets. Periodic performance reports will provide a detailed description of the policy benchmark composition over time.

The System's actuary sets an expected return based on the Board's policy decisions. Market cycles may result in the System earning a return materially above or below the actuarial rate of return for extended periods of time. Therefore, the actuarial rate of return will not be used for performance comparison purposes.

Total Equity

The total equity exposure of the portfolio shall be well diversified with broad exposures to small, mid, and large capitalization companies and growth and value style sectors across U.S. and non-U.S. markets. The goal for total equity shall be to achieve a total rate of return that will exceed, net of all fees and costs, the return of the aggregate global equity market as measured by the Morgan Stanley Capital International (MSCI) All Country World Index (ACWI) Investable Market Index (IMI) over a full market cycle (approximately five years). Because the total equity portfolio was previously segregated into domestic and global equity components, the total equity portfolio has a bias to domestic equity relative to the MSCI ACWI IMI. Therefore, to ensure appropriate performance measurement, the benchmark for total equity will be weighted 30% to the Dow Jones U.S. Total Stock Market Index and 70% to the MSCI ACWI IMI Index until the domestic allocation is in line with the global opportunity set as defined by the MSCI ACWI IMI. The manager structure of the total equity portfolio should resemble the weighted average of their respective benchmarks and avoid any material biases due to a concentration of managers or management styles. To achieve this goal, the Board may employ various actively managed and passive mandates. The structure of the equity component will be analyzed annually to ensure proper diversification is achieved.

Fixed Income

The manager structure of the aggregate fixed income portfolio's risk exposure should resemble the aggregate domestic fixed income market as measured by the Barclays U.S. Universal Bond Index. To help achieve this goal, the Board will employ investment managers that invest assets in a broad array of sectors (government, mortgage backed, credits, asset backed, and commercial mortgage backed bonds), maturities, and credit qualities so that the overall portfolio structure is not materially different from that of the domestic and global fixed income markets. To provide a broad base of low-cost diversification and readily available liquidity, the Board may allocate a portion of the fixed income assets to a passive investment portfolio that approximates the return of the broad fixed income market. The goal for fixed income investments shall be to achieve a total rate of return that will exceed, net of all costs and fees, the return of the Barclays U.S. Universal Bond Index over a full market cycle (approximately five years).

Investment Policies and Procedures (Continued)

Opportunistic/Alternative Investments

The Opportunistic/Alternatives asset class may include investments in direct hedge funds, hedge fund of funds, commodities, currency mandates, and other alternative strategies that are not closely correlated or related to the traditional asset classes (fixed income, equities, private equity, and real assets). Unique investments that do not fit within the other asset class categories may also be included in the Opportunistic/Alternative category at the Board's discretion.

Because this category may include illiquid investments made through closed end investment partnerships, it may take a period of time to reach the target allocation of 5%. Assets will be invested in the total equity asset class until the total target is attained.

The benchmark for the category will be a weighted average of the benchmarks of the underlying strategies.

The goal of the credit, global macro, and other liquid alternative investments shall be to achieve a total rate of return that will exceed, net of all fees and costs, the return of the appropriate institutional quality hedge fund index over a full market cycle (approximately five years). Appropriate benchmarks will be determined as investments are added to the portfolio.

Real Assets

The Real Asset category may include real estate, timber, agriculture, and infrastructure. While no fixed targets are set, the following general parameters have been identified:

- 10% Real Estate
- 2% Timber
- 1% Agriculture
- 2% Infrastructure

The total target of the asset class will be 15%. Because this category may include illiquid investments made through closed end investment partnerships, it will take a period of time to reach these targets. Assets will be invested in the U.S. equity asset class until the total target is attained.

The System may initiate investments in real estate as governed by the Real Asset Statement of Investment Policy. The System's goal for real estate is to not materially exceed the System's approved target asset allocation for total real estate investments as determined by the Board at the beginning of each fiscal year. Should the real estate target asset allocation be exceeded, the Executive Director, working with the Real Estate Consultant, shall develop a pacing and strategy plan to address the over allocation.

ATRS' Real Estate portfolio is benchmarked on a net of fee basis against the NCREIF Fund Index Open-end Diversified Core Equity Index ("NFI-ODCE"). Once ATRS' Real Estate portfolio reaches its full target allocation for a five year period, it is expected to meet or exceed the NFI-ODCE over rolling five year periods.

The System may initiate direct ownership in timberland or indirect investments in fund of funds, partnerships, corporations, or real estate investment trusts ("REITs") investing in investment grade properties of like kind.

The goal of the timberland investments shall be to achieve a total rate of return that will exceed, net of all fees and costs, the return of the NCREIF Timberland Property Index ("NTPI") over a five year rolling period weighted according to ATRS' regional exposure based on Net Asset Value.

The goal of the agriculture investments shall be to achieve a total rate of return that will exceed, net of all fees and costs, the return of the NCREIF Farmland Index ("NFI") over a five year rolling period weighted according to ATRS' regional and crop type exposure based on Net Asset Value.

The goal of the infrastructure investments shall be to achieve a total rate of return that will exceed, net of all fees and costs, the return of the Consumer Price Index (CPI) plus 5 percentage points over a full market cycle (approximately ten years). The Consumer Price Index plus 5 percentage points will be used as the benchmark to reflect the opportunity cost of investing in infrastructure. Similar infrastructure programs of institutional investors will also be used as a secondary benchmark to the extent such data is made available.

Investment Policies and Procedures (Continued)

The ATRS Total Real Asset Benchmark is weighted by the allocations based on Net Asset Values across the various sub-categories, and thus defined as Real Estate benchmark, Timber benchmark, Agriculture benchmark and Infrastructure benchmark. The net of fee return for ATRS' Total Real Asset Portfolio is expected to meet or exceed the Total Real Asset Benchmark over rolling five year periods.

Private Equity

The System may initiate investments in private equity as governed by the Private Equity Statement of Investment Policy. Private equity investments may include domestic and foreign private equity partnerships, venture capital, and mezzanine financing partnerships that are intended to diversify the assets and reduce the likelihood of material losses in any individual investment classification. The investment consultant responsible for private equity shall advise the Executive Director and Board on the Private Equity Statement of Investment Policy and the structure of private equity investments best suited for the System.

The System's goal for private equity investments is to achieve a total rate of return that will exceed, net of all costs and fees, the return of the public equity markets, as measured by the Dow Jones U.S. Total Stock Market Index, plus a liquidity premium of 2 percentage points per year over a full market cycle for private equity (approximately ten years).

Cash Equivalents

The System may hold direct ownership in short-term investments or may permit or require managers to hold cash or cash equivalents to meet liquidity needs of the investment manager or of the System.

The System's cash management goal shall be to preserve capital and maintain liquidity.

Arkansas-Related Investments

The System may initiate Arkansas-related mortgage loans, promissory notes, direct real estate investments, or purchase insured certificates of deposit or short term securities of Arkansas financial institutions to meet the goals of the mandated requirements. Arkansas-related investments are categorized according to the appropriate asset class for each investment. In addition, Arkansas related investments include, but are not limited to, investments managed by an Arkansas related manager, Arkansas related investments held by other fund managers, Arkansas timberland, partnerships based in Arkansas, and partnerships holding Arkansas properties.

Commingled or Mutual Funds

If a commingled fund or mutual fund is utilized, the portfolio will be governed by the prospectus or similar document for the fund. In those cases, the System will utilize the prudent investor rule and advice of the investment consultant in selecting and evaluating funds initially and in monitoring them on an on-going basis.

Derivatives

Derivatives may be used to reduce the risk in a portfolio and provide desired market and security level positions as an alternative to purchasing cash securities. Excessive leverage shall not be created through the use of derivatives in a manner that substantially increases the System's portfolio risk. Each investment manager's derivative usage shall be specified in the investment management agreement or specific guidelines.

The use of futures and options shall be matched by cash or cash equivalent securities, and all short futures positions shall be matched by equivalent long security positions, unless otherwise stated in the investment manager guidelines or authorizing fund documents.

Loaning of Securities

The lending agent will evaluate the credit-worthiness of potential borrowers of securities, and will loan securities only to financially sound borrowers. The lending agent will maintain a diversified list of such borrowers in order to mitigate the counterparty risk that is inherent in securities lending.

Collateral levels should be based on the nature of the loaned security and will generally be between 102% and 105% of the market value of the borrowed security. Marking to market will be performed every business day subject to de minimis rules of change in value, and borrowers will be required to deliver additional assets as necessary to maintain over-collateralization of securities loans.

Investment Policies and Procedures (Continued)

Securities Lending Reinvestment Guidelines

The cash collateral portfolio will be managed on an amortized cost basis (maintain a \$1 net asset value) and have investment guidelines that are 2a-7-like in nature (money market fund guidelines) to ensure that only a moderate amount of risk is taken on the reinvestment of the cash collateral. This will control the amount of credit and duration risk that can be taken by the short duration fixed income manager, which will help to mitigate losses due to insufficient collateral relative to the amount on loan. In addition, guidelines for the cash collateral portfolio will be created in conjunction with the lending strategy and with input from the securities lending agent.

The collateral pool should also maintain a reasonable level of overnight liquidity in order to allow for the smooth recall of securities over time.

Investment Manager Reporting

The System will require all investment managers, managing partners, and general partners to provide on at least a quarterly and an annual basis, reporting appropriate for the investment.

Roles

The Executive Director and investment consultant are jointly responsible for the initial selection of investment managers and any increase or decrease in an investment manager's funding. The Executive Director and investment consultant are jointly responsible for monitoring existing investment managers on performance, stability, and compliance. The Executive Director and investment consultant may also recommend termination of an investment manager when circumstances justify termination. Reasons for termination include, but are not limited to, relative performance, relative stability, costs, strategic allocation of assets, or other relevant factors that a prudent investor would use.

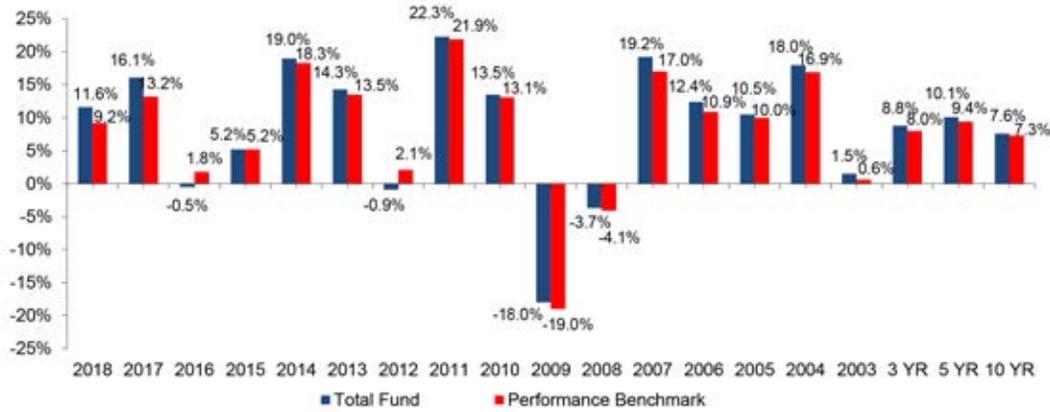

Proxies

The System authorizes the investment manager to vote all proxies related to stocks in which it invests the System's assets. The System expects the investment manager to cast votes solely in the best interest of plan beneficiaries.

DESCRIPTION OF BENCHMARKS

Total Fund – The Performance Benchmark for the Total Fund reflects a weighted average of the underlying asset class benchmarks, weighted as follows: Opportunistic/Alternatives and Real Assets at the weight of the previous month’s ending market values, Fixed Income and Private Equity at their long-term Policy Targets of 15% and 10%, respectively, and Total Equity at its long-term Policy Target of 55% plus the balance of the unfunded or uncommitted assets of the Opportunistic/Alternatives and Real Assets categories. From October 2007 to July 2013, the Performance Benchmark was the performance of the asset class benchmarks as a weighted average of the previous month’s ending market values. The historical components of the benchmark are shown in the table below. Returns prior to September 30, 1996, consist of the actual allocations to the seven different asset classes included in the ATRS portfolio over time. The historical benchmarks used for each asset class are noted below.

Date	DJ U.S. Total Stock Market Index	Russell 3000 Index	MSCI ACW ex-U.S. Index	MSCI ACWI	Barclays U.S. Universal Bond Index	Barclays Aggregate Bond Index	Alternative Policy ¹
3/31/2004 to 9/30/2007	40.0%	-	17.5%	-	25.0%	-	17.5%
7/31/2003 to 2/29/2004	40.0%	-	17.5%	-	-	25.0%	17.5%
10/31/2001 to 6/30/2003	-	40.0%	17.5%	-	-	25.0%	17.5%
8/31/1998 to 9/30/2001	-	40.0%	17.0%	-	-	28.0%	15.0%
10/31/1996 to 7/31/1998	-	40.0%	20.0%	-	-	28.0%	12.0%

¹Currently, the benchmarks for Real Assets and Opportunistic/Alternatives are included in the Total Fund Performance Benchmark at their actual beginning quarter weights. Prior to October 1, 2007, private equity, real estate, and other alternatives (timber) were grouped together in one “Alternatives Asset Class.” The Alternative Policy for this asset class was comprised of the weighted average of the Real Estate, Private Equity, and Other Alternatives policy benchmarks. Prior to July 31, 2003, the alternative benchmark consisted of 57.0% of the Russell 3000 + a 2% Premium per year; 8.5% of the NCREIF South Timberland Index, 28.5% of the Real Estate Index, 6% of the EnnisKnupp STIF Index. After this date, real estate and private equity benchmarks started to report on a one-quarter lag to align with the returns of their asset classes.

Total Equity – A weighted average of the Dow Jones U.S. Total Stock Market Index and the MSCI All Country World IMI Index based on weights of the underlying investment manager allocations. As of December 31, 2016, the Total Equity Performance Benchmark was comprised of 35.6% DJ U.S. Total Stock Market Index and 64.4% MSCI ACWI IMI.

Total Fixed Income – The Barclays U.S. Universal Bond Index as of March 1, 2004.

Total Opportunistic/Alternatives – A custom benchmark consisting of 25% DJ/CS Event-Driven Index, 25% HFR Macro Index, and 50% South Timberland NCREIF Index until June 30, 2013; 60% HFR Macro Index and 40% DJ/CS Event-Driven Index until July 31, 2015; 56% HFRI Macro Index, 38% DJ/CS Event-Driven Index, and 6% Russell 2000 Index until March 31, 2016; 45% HFRI Macro Index, 30% DJ/CS Event-Driven Index, 5% Russell 2000 Index, and 20% Citigroup 3 Month T-bill until May 31, 2016; 37% HFRI Macro Index, 25% DJ/CS Event-Driven Index, 5% Russell 2000 Index, and 33% Citigroup 3 Month T-bill until May 31, 2017; 28% HFRI Macro Index, 20% DJ/CS Event-Driven Index, 4% Russell 2000 Index, 25% Citigroup 3 Month T-bill, and 23% Parametric Performance Benchmark thereafter.

Total Real Assets – A custom benchmark consisting of a weighted average of the net asset values at previous month’s end of the subcategories’ benchmarks, defined as Real Estate Benchmark, Timber Benchmark, Agriculture Benchmark and Infrastructure Benchmark.

DESCRIPTION OF BENCHMARKS (Continued)

Real Estate - NFI-ODCE - NCREIF Fund Index Open-end Diversified Core Equity Index.

Timber Benchmark - NCREIF Timberland Property Index (NTPI) weighted according to ATRS' regional exposure based on net asset value.

Agriculture Benchmark - NCREIF Farmland Index (NFI) weighted according to ATRS' regional and crop type exposure based on net asset value.

Infrastructure Benchmark - Consumer Price Index (CPI) plus 500 basis points annually.

Total Private Equity - The Dow Jones U.S. Total Stock Market Index + a 2% premium per year.

Cash Equivalents - The Citigroup 90 day T-bill.

Allianz Performance Benchmark - On January 1, 2005, the benchmark for the portfolio was changed to the Merrill Lynch Convertible Bond (All Quality) Index. Prior to January 1, 2005, the performance benchmark for the Allianz (previously Nicholas Applegate) portfolio was the CSFB Convertible Securities Index. Prior to May 1, 2004, the performance benchmark consisted of 90% CSFB Convertible Securities Index and 10% Salomon High Yield Index.

BlackRock Performance Benchmark - The Barclays U.S. Universal Bond Index as of March 1, 2004. Previously it was the Barclays Aggregate Bond Index.

Jacobs Levy Performance Benchmark - On January 1, 2008, the benchmark for the portfolio was changed to the Russell 3000 Index. Prior to January 1, 2008, the portfolio benchmark was the Russell 1000 Growth Index.

Loomis Sayles Performance Benchmark - An Index that splices 65% of the Barclays Capital Government/Credit Index and 35% Barclays Capital High Yield Index.

PIMCO Performance Benchmark - The Barclays U.S. Universal Bond Index as of March 1, 2004. Previously it was the Barclays Capital Aggregate Bond Index.

Wellington Global Performance Benchmark - As of July 1, 2012 the benchmark was changed to MSCI All Country World Small Cap Index. Prior to July 1, 2012, the benchmark was MSCI All Country World Small/Mid Cap Index.

Barclays Aggregate Bond Index - A market-value weighted index consisting of the Barclays Corporate, Government and Mortgage-Backed Securities Indices. The Index also includes credit card-, auto- and home equity loan-backed securities, and is the broadest available measure of the aggregate U.S. fixed income market.

Barclays Government/Credit Index - The Barclays Government/Credit Index measures the investment return of all medium and larger public issues of U.S. Treasury, agency, investment-grade corporate, and investment-grade international dollar-denominated bonds.

Barclays High Yield Index - The Barclays High Yield Index covers the universe of fixed rate, non-investment grade debt. Pay-in-kind (PIK) bonds, Eurobonds, and debt issues from countries designated as emerging markets (e.g., Argentina, Brazil, Venezuela, etc.) are excluded, but Canadian and global bonds (SEC registered) of issuers in non-EMG countries are included.

Barclays U.S. Universal Bond Index - A market-value weighted index consisting of the components of the Barclays Aggregate Bond Index, plus EuroDollar bonds, emerging markets bonds, 144A fixed income securities, and U.S. corporate high yield securities.

DESCRIPTION OF BENCHMARKS (Continued)

Citigroup 90 day T-bill Index - Treasury bill rates of return, as reported by Citigroup (Salomon Smith Barney), for bills with a maximum time remaining to maturity of 90 days.

DJ/CS Event-Driven Index - Event driven funds typically invest in various asset classes and seek to profit from potential mispricing of securities related to a specific corporate or market event. Such events can include: mergers, bankruptcies, financial or operational stress, restructurings, asset sales, recapitalizations, spin-offs, litigation, regulatory and legislative changes as well as other types of corporate events. Event driven funds can invest in equities, fixed income instruments (investment grade, high yield, bank debt, convertible debt and distressed), options and various other derivatives. Many event driven fund managers use a combination of strategies and adjust exposures based on the opportunity sets in each subsector.

Dow Jones U.S. Total Stock Market Index - A capitalization-weighted stock index representing all U.S. common stocks traded regularly on the organized exchanges. The Index is the broadest measure of the aggregate U.S. stock market.

FTSE Europe - A tradable index, designed to represent the performance of the 100 most highly capitalized blue chip companies in Europe.

HFR Macro Index - An index representing investment managers which trade a broad range of strategies in which the investment process is predicated on movements in underlying economic variables and the impact these have on equity, fixed income, hard currency and commodity markets.

HFR Distressed/Restructuring Index - An index representing distressed restructuring strategies which employ an investment process focused on corporate fixed income instruments, primarily on corporate credit instruments of companies trading at significant discounts to their value at issuance or obliged (par value) at maturity as a result of either formal bankruptcy proceeding or financial market perception of near term proceedings.

LIBOR Index - London Interbank Offered Rate. A filtered average of the world's most creditworthy banks' interbank deposit rates with maturities between overnight and one full year.

Merrill Lynch Convertible Bond (All Quality) Index - The Merrill Lynch All Convertibles All Qualities Index is a widely used index that measures convertible securities' performance. It measures the performance of U.S. dollar-denominated convertible securities not currently in bankruptcy with a total market value greater than \$50 million at issuance.

MSCI All Country World Index - A capitalization-weighted index of stocks representing 46 developed and emerging country markets.

MSCI Europe, Australasia, Far East (EAFE) Non-U.S. Stock Index - A capitalization-weighted index of stocks representing 23 developed and emerging country markets in Europe, Australia, Asia and the Far East.

MSCI World Index - A capitalization-weighted index of stocks representing 23 developed stock markets in Europe, Asia and Canada.

NFI-ODCE Index - NCREIF Fund Index Open-end Diversified Core Equity Index is an index of investment returns reporting on both a historical and current basis the results of 33 open-end commingled funds pursuing a core investment strategy; underlying funds are leveraged with gross and net returns available.

Russell 3000 Index - An index that measures the performance of the 3000 stocks that make up the Russell 1000 and Russell 2000 Indices.

Russell 1000 Index - An index that measures the performance of the largest 1,000 stocks contained in the Russell 3000 Index.

DESCRIPTION OF BENCHMARKS (Continued)

Russell 1000 Value Index - An index that measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower I/B/E/S growth forecasts.

Russell 2000 Index - An index that measures the performance of the smallest 2000 companies contained in the Russell 3000 Index.

Russell 2000 Growth Index - An index that measures the performance of those Russell 2000 companies with greater price-to-book ratios and greater I/B/E/S growth forecasts.

Russell 2000 Value Index - An index that measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower I/B/E/S growth forecasts.

S&P 500 Stock Index - A capitalization-weighted stock index consisting of the 500 largest publicly traded U.S. stocks.

South Timberland Index - The largest regional subindex of the NCREIF Timberland Index, consisting of timberland properties held in the U.S. South. This includes close to 300 properties with more than 10 million cumulative acres of timberland in the following states: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia. Calculations are based on quarterly returns at the individual property level. Performance is reported on an all-cash, unlevered basis, gross of investment management fees.

DESCRIPTION OF UNIVERSES

Total Fund - The Total Fund and its benchmark are ranked in our Public Fund Universe. The universe is calculated based on data provided by BNY Mellon Performance & Risk Analytics, LLC, and includes roughly 85 public pension plans each with assets greater than \$1 billion.

Total Equity - The total equity component and its benchmark are ranked in our global equity component universe. The universe is calculated based on data provided by BNY Mellon Performance & Risk Analytics, LLC, and includes more than 450 global equity portfolios.

Total Fixed Income - The total fixed income component and its benchmark are ranked in our fixed income component universe. The universe is calculated based on data provided by BNY Mellon Performance & Risk Analytics, LLC, and includes the fixed income asset class returns of approximately 50 public pension plans each with assets greater than \$1 billion.

ACTUARIAL

AR TRS
Arkansas Teacher Retirement System

Actuary's Certification Letter

800.521.0498 | P: 248.799.9000 | F: 248.799.9020 | www.grsconsulting.com

December 5, 2018

Board of Trustees
Arkansas Teacher Retirement System
1400 West Third Street
Little Rock, Arkansas 72201

Dear Board Members:

The basic funding objective of the Arkansas Teacher Retirement System (ATRS) is to establish and receive contributions which:

- When expressed in terms of the percentage of active member payroll, will remain approximately level from generation to generation; and
- When combined with present assets and future investment return, will be sufficient to meet the financial obligations of ATRS to present and future retirees and beneficiaries.

The progress being made toward the realization of the financing objectives of the System through June 30, 2018 is illustrated in the attached Exhibits 1 and 2. Actuarial funding valuations are performed each year and the most recent funding valuations were completed based upon census data, asset data, and plan provisions as of June 30, 2018. In addition to the funding valuation reports, the actuary produces separate financial reporting information in accordance with Governmental Accounting Standards Board (GASB) Statements No. 67 and No. 68.

The System's administrative staff provides the actuary with data for the actuarial valuations. The actuary relies on the census data after reviewing it for internal and year-to-year consistency. Member data was not audited by the actuary. The actuary summarizes and tabulates population data in order to analyze longer term trends. Asset information was also accepted without audit. We are not responsible for the accuracy or completeness of any information provided by ATRS.

The figures disclosed in the Supplementary Schedules to the Financial Section were provided by Gabriel, Roeder, Smith & Company, as were the Notes to Trend Data. In addition, Gabriel, Roeder, Smith & Company was responsible for the following schedules found in the Actuarial Section:

Computed Actuarial Liabilities	Assumed Duration in T-DROP for Members
Determination of Amortization Period as of June 30, 2018	Teachers Separations and Individual Pay Increases
Active Members in Valuation Data	Support Employees Separations and Individual Pay Increases
Retirees and Beneficiaries Added to and Removed from Rolls	Actuarial Gain (Loss) by Risk Area
Short Condition Test	Comments
Summary of Actuarial Assumptions and Methods	Schedule of Retired Members by Benefit Type
Single Life Retirement Values	Schedule of Average Benefit Payments
Probabilities of Retirement for Members	

Assets are valued on a market related basis that recognizes each year's difference between actual and assumed investment return over a closed four-year period.

Actuarial valuations are based upon assumptions regarding future activity in specific risk areas including the rates of investment return and payroll growth, eligibility for the various classes of benefits, and longevity among retired lives. The Board adopts these assumptions after considering the advice of the actuary and other professionals. The assumptions and methods used for funding purposes meet the

parameters set by the Actuarial Standards of Practice. Each actuarial valuation takes into account all prior differences between actual and assumed experience in each risk area. The June 30, 2018 valuations were based upon assumptions that were recommended in connection with a study of experience covering the 2010-2015 period.

The Arkansas Teacher Retirement System remains stable with an 80.0% funded position (based on the actuarial value of assets) and an 83.6% funded position based upon the market value of assets as of June 30, 2018. The amortization period as of June 30, 2018 is 28 years.

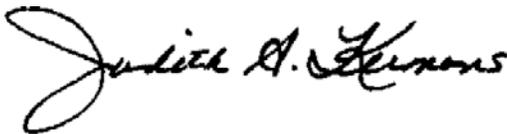

Based upon the results of the June 30, 2018 valuations, we are pleased to report to the Board of Trustees that the Arkansas Teacher Retirement System is meeting its basic financial objective of level percent-of-payroll financing.

Readers desiring a more complete understanding of the actuarial condition of ATRS are encouraged to obtain and read the complete actuarial valuation reports. The complete reports also contain certain very important disclosures mandated by Actuarial Standards of Practice. The material in the Actuarial Section and Financial Sections of this CAFR contains some, but not all, of the information in the actuarial reports.

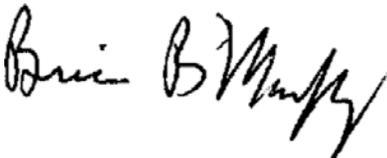

Future actuarial measurements may differ significantly from the current measurements presented in this information due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements; and changes in plan provisions or applicable law. This information does not contain an analysis of the potential range of such future measurements.

This information has been prepared by actuaries who have substantial experience valuing public employee retirement systems. Judith A. Kermans, Brian B. Murphy, and Heidi G. Barry are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,

Judith A. Kermans, EA, FCA, MAAA

Brian B. Murphy, FSA, EA, FCA, MAAA, PhD

Heidi G. Barry, ASA, FCA, MAAA

Liabilities to be Covered by Future Contributions	\$ 7,153,585,856	\$ 2,974,966,483	\$ 4,178,619,373

EXHIBIT 2 DETERMINATION OF AMORTIZATION PERIOD

AS OF JUNE 30, 2018 AND JUNE 30, 2017

Computed Contributions for	Percents of Active Member Payroll			
	June 30, 2018			June 30, 2017
	Teachers	Support	Combined	Combined
Normal Cost				
Age & Service Annuities	10.38%	6.94%	9.40%	9.29%
Deferred Annuities	1.18%	2.09%	1.44%	1.45%
Survivor Benefits	0.36%	0.27%	0.33%	0.33%
Disability Benefits	0.48%	0.38%	0.45%	0.45%
Refunds of Member Contributions	0.46%	1.11%	0.65%	0.66%
Total	12.86%	10.79%	12.27%	12.18%
Average Member Contributions	6.43%	4.94%	6.01%	5.94%
Net Employer Normal Cost	6.43%	5.85%	6.26%	6.24%
Unfunded Actuarial Accrued Liabilities			8.74%	8.76%
Employer Contribution Rate			15.00%	15.00%
Amortization Years			28	29

The calculated amortization period of 28 years is based on anticipated increases in the employer and member contribution rates. The current employer and member contribution rates are 14% and 6%, respectively. The employer and member rates are scheduled to increase by 0.25% increments beginning in Fiscal Year 2020 and ending in Fiscal Year 2023. The ultimate employer and member contribution rates will be 15% and 7%, respectively.

The amortization period is the number of years it will take to pay off the unfunded liability of \$4.2 billion assuming that the employer contribution rate increases to 15% according to the schedule described above. Since 2000, the period has varied from a low of 19 years to a high of over 100 years. Unless there is an investment gain in FY 2019, the amortization period is likely to increase in the next valuation.

SCHEDULE OF ACTIVE MEMBER VALUATION DATA

Valuation Date June 30,	Active Members in Valuation		Average Annual Pay	
	Number	Annual Payroll (Millions)	Amount	% Change
2018	72,341	\$2,872	\$39,702	1.8%
2017	72,148	\$2,814	\$38,997	1.1%
2016	72,232	\$2,785	\$38,557	1.2%
2015	72,919	\$2,777	\$38,088	2.7%
2014	74,352	\$2,758	\$37,092	1.9%
2013	74,925	\$2,727	\$36,400	0.0%
2012	75,627	\$2,714	\$35,891	1.0%
2011	76,780	\$2,728	\$35,534	7.7%
2010	72,208	\$2,381	\$32,980	0.5%
2009	70,655	\$2,318	\$32,804	1.5%

Beginning with the June 30, 2011 valuation, active member information includes T-DROP participation. The schedule does not include retirees who return to work.

SCHEDULE OF RETIREES AND BENEFICIARIES ADDED TO AND REMOVED FROM ROLLS

Year	Estimated Number		Total Retirees	Annual Allowances (Millions)	% Increase in Annual Allowances	Average Annual Allowances

[@] Increased percent due to T-DROP annuities included in 2015.

SHORT CONDITION TEST

ATRS' funding objective is to meet long-term benefit promises through contributions that remain approximately level from year to year as a percent of member payroll. If the contributions to the System are level in concept and soundly executed, the System will **pay all promised benefits when due - the ultimate test of financial soundness**. Testing for level contribution rates is the long-term test.

A **short condition test** is one means of checking a system's progress under its funding program. In a short condition test, the plan's present assets (cash and investments) are compared with: 1) Member contributions on deposit; 2) The liabilities for future benefits to present retired lives; 3) The liabilities for service already rendered by members. In a system that has been following the discipline of level percent-of-payroll financing, the liabilities for member contributions on deposit (liability 1) and the liabilities for future benefits to present retired lives (liability 2) will be fully covered by present assets (except in rare circumstances). In addition, the liabilities for service already rendered by members (liability 3) will be partially covered by the remainder of present assets. The larger the funded portion of liability 3, the stronger the condition of the system. Liability 3 being fully funded is unusual.

The schedule below illustrates the history of liability 3 of the System and is indicative of the ATRS objective of following the discipline of level percent-of-payroll financing.

Val. Date June 30,	(1) Member Contrib.	(2) Retirees and Benef.	(3) Active and Inactive Members (Employer Financed Portion)	Present Valuation Assets	Portion of Present Values Covered by Present Assets

* Revised actuarial assumptions or methods.

Legislated benefit or contribution rate change.

SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS

An actuarial valuation is based upon an actuarial cost method, an asset valuation method, and actuarial assumptions. These methods and assumptions are chosen by the Board of Trustees after consultation with the Actuary and other advisors.

The actuarial cost method is called the Entry Age Actuarial Cost Method. This method is consistent with the Board's level percent-of-payroll funding objective. With this method, the level percent-of-payroll is determined that will fund a member's retirement benefit over the member's entire working lifetime, from date of hire (Entry Age) to date of exit from the active member population. Differences in the past between assumed and actual experience become part of unfunded actuarial accrued liabilities and are amortized with level percent-of-payroll contributions. This cost method was first used in the **June 30, 1986** valuation.

The asset valuation method is a four-year smoothed market value method in which assumed investment return is recognized immediately each year and differences between actual and assumed investment return are phased-in over a closed four-year period. This asset valuation method is intended to give recognition to the long-term accuracy of market values while filtering out and dampening short-term market swings. This method was first used in the **June 30, 1995** valuation. It was modified in conjunction with the 2002 valuation to include a corridor. Assets were set to market value in 2012 to reduce future volatility.

The actuarial assumptions used in producing the valuation fall into two broad classes: economic assumptions, and demographic assumptions. Economic assumptions refer to long term rates of investment return, wage growth, covered population growth, and inflation. Demographic assumptions refer to retirement rates, turnover rates, disability rates and mortality rates. The current assumptions are based upon a 2010-2015 study of experience of the Arkansas Teacher Retirement System. The assumptions are reviewed from time to time to keep them reasonably current with expected experience.

Economic Assumptions

The **price inflation** assumption is 2.50% although no specific Price Inflation is needed for this valuation. It is assumed that the 3% COLA will always be paid.

The **wage inflation** assumption is 2.75%. This consists of 2.50% related to pure price inflation and 0.25% related to general economic improvements.

The investment return rate used in the valuation was 7.50% per year, compounded annually (net after administrative expenses). This rate of return is not the assumed real rate of return. The real rate of return over wage inflation in this valuation is defined to be the portion of investment return which is more than the wage inflation rate. Considering wage inflation recognition of 2.75%, the 7.50% rate translates to an assumed real rate of return over wage inflation of 4.75%. This rate was first used for the June 30, 2017 valuation. The assumed real rate of return over price inflation is 5%.

Pay increase assumptions for individual active members are shown in Tables IV and V. Part of the assumption for each age is for a merit and/or seniority increase, and the other 2.75% recognizes wage inflation. These rates were first used for the **June 30, 2017** valuation.

The Active Member Group size is assumed to remain at its present level.

Total active member payroll is assumed to increase 2.75% a year, which is the portion of the individual pay increase assumptions attributable to wage inflation. This rate was first used for the **June 30, 2017** valuation.

Non-Economic Assumptions

The mortality tables used were the RP-2014 Healthy Annuitant, Disabled Annuitant and Employee Mortality headcount weighted tables for males and females. Mortality rates were adjusted for future mortality improvements using projection scale MP-2017 from 2006. Related values are shown in Table I. These tables were first used for the **June 30, 2017** valuation.

A limited fluctuation credibility procedure was used to determine the appropriate scaling factor of each gender and each member classification (see the 2010-2015 Experience Study), and are shown below:

	<u>Scaling Factor</u>
Healthy Male Retirees	101%
Healthy Female Retirees	91%
Disabled Male Retirees	99%
Disabled Female Retirees	107%
Male Active Members	94%
Female Active Members	84%

The probabilities of retirement for members eligible to retire are shown in Tables II and III. The rates for full retirement and reduced retirement were first used in the **June 30, 2017** valuation.

The probabilities of withdrawal from service, **death-in-service**, and **disability** are shown for sample ages in Tables IV and V. These rates were first used in the **June 30, 2017** valuation.

The data about persons now covered and about present assets was furnished by the System's administrative staff. Although examined for general reasonableness, the data was not audited by the actuary. Members whose dates of birth were not supplied were assumed to be 40 years old on the valuation date.

ACTUARIAL GAIN (LOSS) BY RISK AREA

During the Period July 1, 2017 to June 30, 2018

Type of Risk Area	Gain (Loss) in Period	
	\$ Millions	Percent of Liabilities
ECONOMIC RISK AREAS Pay increases. <i>If there are smaller pay increases</i> than assumed, there is a gain. If greater increases, a loss.	\$(25.7)	(0.13)%
Gross Investment Return. <i>If there is greater investment</i> return recognition than assumed, there is a gain. If less return recognition, a loss.	44.4	0.22%
NON-ECONOMIC RISK AREAS Retirements. <i>If members retire at older</i> ages, there is a gain. If younger ages, a loss.	13.3	0.07%
Disability Retirements. <i>If there are fewer disabilities</i> than assumed, there is a gain. If more, a loss.	0.8	0.00%
Death-in-Service Benefits. <i>If there are fewer</i> than assumed, there is a gain. If more, a loss.	(0.2)	0.00%
Withdrawal. <i>If more liabilities are released by other</i> separations than assumed, there is a gain. If smaller releases, a loss.	7.3	0.04%
Death After Retirement. <i>If there are more deaths</i> than assumed, there is a gain. If fewer, a loss.	1.7	0.01%
ACTUARIAL GAIN (LOSS) DURING PERIOD	41.6	0.20%
BEGINNING OF YEAR ACCRUED LIABILITIES*	\$20,298.4	100.0%

*Adjusted for change in Assumptions.

COMMENTS

General Financial Objective. Section 24-7-401(a) of the Arkansas Code provides as follows (emphasis added):

“6.01. (i) The general financial objective of each Arkansas public employee retirement plan shall be to **establish and receive contributions which, expressed as percents of active member payroll, will remain approximately level from generation to generation of Arkansas citizens.** More specifically, contributions received each year shall be sufficient both to (i) fully cover the costs of benefit commitments being made to members for their service being rendered in such year, and (ii) make a level payment which if paid annually over a reasonable period of future years will fully cover the unfunded costs of benefit commitments for service previously rendered...”

Arkansas Teacher Retirement System Status: Based upon the results of June 30, 2018 actuarial valuations, *ATRS is satisfying the financial objective of level-contribution-percent financing.*

The amortization period this year is 28 years, down from last year’s period of 29 years. This result is heavily dependent upon member and employer rates increasing in accordance with the following schedule:

Fiscal Year	Contribution Rate	
	Member	Employer
2018-2019	6.00%	14.00%
2019-2020	6.25%	14.25%
2020-2021	6.50%	14.50%
2021-2022	6.75%	14.75%
2023 and Later	7.00%	15.00%

While 28 years is a reasonable period that meets statutory requirements, use of such a period will result in unfunded liabilities that are projected to increase in dollar amount for approximately the next 10 years. This condition is called “negative amortization” and is falling out of favor. The ATRS has targeted 18 years as the threshold in recent legislation.

The Arkansas Teacher Retirement System remains stable with an 80.0% funded position as of June 30, 2018. Unless there is an investment loss in Fiscal Year 2019, the amortization period may decrease in the next valuation due to the scheduled phase-in of investment gains.

The rate of investment return was 11.36%# this year. As of June 30, 2018, the market value of assets exceeded the actuarial value of assets by approximately \$737 million. Investment gains and losses that occur each year are smoothed in over a four-year period. After considering smoothing, the recognized return this year was 7.78%, compared to an assumed 7.5% return for Fiscal 2018.

This investment return figure was calculated by the actuary and may not exactly match your investment consultant’s figure.
